

barriers technical guide

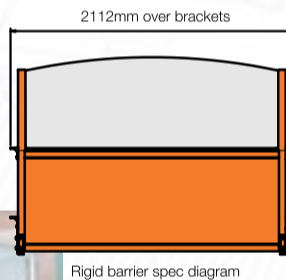

Fabric Barriers

- Removable fabric barrier with stainless steel posts.
- Barrier is 1200mm high and 2000mm long.
- The stainless steel post is 60mm diameter with 350mm diameter base 25mm thick.
- Mild steel powder coated option available. (Various RAL colours to suit).
- The round base allows ease of removal and has a rubber protection strip with a decorative stainless steel trim on the edge.
- The vinyl mesh fabric is 1000mm high and is digitally printed with the background colour.
- Branding is available on the vinyl mesh fabric.

Rigid Barriers

- Permanent barrier with aluminium frame and toughened glass.
- Barrier is 1450mm high and 2000mm long.
- The panel is 3mm aluminium.
- The glass is 700mm high 6mm toughened glass.
- The aluminium framework is 50 x 50mm box section.
- These barriers are permanently bolted down to a suitable surface or concrete pad.
- The barriers can be assembled in straight runs or angled arrangements to create outdoor areas.
- Branding is available on the aluminium panel and/or glass.
- The aluminium frame and panel is available powder coated in various RAL colours.
